

## LED SUCCESS

### PROJECT

University Library Fixture Replacement

### LOCATION

University of Massachusetts Amherst  
W.E.B. Du Bois Library, Built in 1972

### PRODUCT

2' & 4' LBI (LINEAR TRANSFORMER) - >12,000 FIXTURES

### SITUATION

Built in 1972, the library required new fixtures to improve lighting and energy efficiency for students and faculty. Lighting Designer originally specified an Acuity strip fixture, but the LPW and lack of adjustability were less than desirable.

### SOLUTION

The LBI was installed as a new fixture in ceiling and stairwell applications throughout the library. 2' and 4' versions were utilized depending on the specific location.

### RESULT

The library has new life via brighter, sleeker and far more efficient lighting fixtures. Savings were maximized via energy rebates and adjustable wattages.

#### DISTRIBUTOR

Ion Lighting Distribution  
Chicopee, MA

#### INSTALLER

Zap Electric  
Three Rivers, MA

#### REPRESENTATIVE

LFD  
Rick Bacca
