CONSULTANT

DELANO SCHOOL
DISTRICT

SITUATION

The school parking lot was not adequately lit and lacked power along the perimeter, and the school's budget did not allow for trenching and wiring to the far side of the parking lot.

SOLUTION

The park was fitted with (15) All-in-One Solar Area Lights (RP-SAL-30W) mounted on 15FT poles that were spaced along the roadside of the parking lot.

RESULTS

Delano High School has a brightly lit parking lot with zero operating cost, improving safety & security for students, faculty and visitors. The solar area lights **"ARE PERFORMING VERY WELL FOR THE SCHOOL & INSTALLATION WAS SIMPLE AS CAN BE."** Ultimately, Delano High School chose to use Solera based on its high quality products that make off-grid lighting more affordable than hard wiring.
