the ultimate LED retrofit kit

RemPhos' LBE (LEDBARKIT External-Drive) universal retrofit kit for linear fluorescent luminaires is the perfect retrofit solution. Delivers better long-term reliability, longer life (10yr warranty), controllability (standard 0-10V dimmable; Dim-to-Off; 12V Aux Standard) and faster paybacks (since Utility incentives are typically higher), when compared to LED tubes. Designed to easily fit into existing T5/T8/T12 linear fluorescent fixtures. Fast, one-person installation.

flexWATT

SIMPLE INSTALLATION

Convert existing fixtures fast with magnets on the back of the light bars that allow hands-free placement (self-drilling screws are pre-captivated on each magnetic bracket for fast & secure install). Electrical quick connects for simple, error-free power connections.

FITS BETWEEN THE SOCKETS

No need to remove existing T5/T8/T12 sockets. The LEDBAR is sized to fit in between the existing sockets, further reducing install time.

MAXIMUM VERSATILITY

Standard lengths along with multiple lamp/driver combinations (1L,2L,3L,4L) provides a fit for any application.

MANY LIGHT OUTPUT CHOICES flexWATT

Systems available from 6W (800LM) all the way to 80W (13,000LM). Standard 10V drivers now include FlexWatt that allows you to choose the exact lumen/wattage package needed. See ordering guide for available lumen packages.

HIGHER OUTPUT TO MATCH T5HO

Previous generation could only be powered up to 20W for the 4ft bar. G2 can be powered at up to 25W for the 4ft bar to match the foot candles of a T5HO FL lamp. All light bars are over 150LPW, with AC wall efficiencies including the driver from 130-145LPW.

SINGLE CCT AVAILABLE

4FT: 25W Max, 3FT: 12W Max, 2FT: 12W Max, 1FT: 8W Max

FLEXWATT STANDARD

Each driver has 4 adjustable wattage choices. With FlexWatt, there are now significantly more wattage choices to allow you to select exactly what lumen/wattage package is needed to maximize energy savings.

DIM-TO-OFF SENSOR READY DRIVERS STANDARD

12V auxiliary power and 10V dimming wires are standard in every kit. Allows for easy interface with dimming switches and control systems.

VARIOUS CONTINUOUS AND STEP-DIM DRIVER OPTIONS.

We want to help you choose the lowest cost, easiest to implement method to dim our retrofit kits. While low voltage 10V dimming is a great approach, often it requires running new wiring. Therefore, we have line voltage phase dimming driver options, 2-switch step-dim driver options (to work with existing inbound/outbound wall switches), and 1-switch step-dim driver options (using 1 existing wall switch change brightness between pre-selected levels of 50%/100% for example).

LESS WATTS TO REPLACE YOUR FLUORESCENT LAMPS

Previously G1 was 10W to replace 32W T8 FL, now with G2 10W or even 8W can be used for deeper energy savings. ordering guide for available systems.

METAL, LINEAR BALLAST SHAPED LED DRIVERS

Previous G1 were plastic cases. New G2 are rigid metal cases, rugged and easy to mount. Thinner height to fit into even the most compact existing ballast compartments..

REMOVABLE, ADJUSTABLE METAL MAGNETIC MOUNTING BRACKETS

Previous G1 had plastic end caps which accepted self-drilling screws and fixed magnets. G2 has an innovative bracket that can be slid anywhere on the bar, so that the screws can be mounted in various places depending on what is fastest/easiest for the install.

LOWER COST EMERGENCY BATTERY BACKUP

VARIOUS BRACKETS AVAILABLE FROM OUR "CUSTOM-SHOP"

Have a direct/indirect pendant hung fixture and want a fast way to mount bars pointing up and down? No problem, we have a solution. Have a wide-body vapor tight where you want 6 bars mounted together along with a motion sensor on a single pan? No problem, we have a solution. Let our engineers help design a bracket/mounting system that makes installation faster and easier for you.

WHY USE THE LBE?

- **More efficient** because the higher efficiency optics, LEDs and drivers we use in these products provide higher lumens per watt and less wattage compared to LED tubes.
- **More reliable** because of the significant amount of aluminum that we use as a heat sink on the back of the LEDBAR to properly dissipate heat and keep the electronics cooler than LED tubes.
- **More universal fit** because our bars are designed to fit in between the sockets of either T5 or T8 fixtures. That means that you can specify a "4ft" LEDBAR for ANY T5 or T8 style fixture whether it be a troffer, a vapor tight, a pendant, a strip etc.
- **Less liability** because you will be getting rid of the old fluorescent tube sockets that often can lead to future issues such as arcing, early failure or even fire, all issues that have occurred in LED tube installations.
- **Better piece of mind** because the LEDBARKIT family comes standard with a 10-year system warranty. For example, something goes wrong with a UL Type A LED tube install, the contractor ends up arguing with the LED tube manufacturer, the ballast manufacturer and the socket manufacturer to see who is at blame. **By purchasing the LEDBARKIT system, RemPhos/Light Efficient Design provides a single, easy point of contact for the system warranty.**
