

## LED SUCCESS

### PROJECT

University Dorms Transformed

### LOCATION

Clark University of Worcester, MA  
Student Housing Complex

### PRODUCT

RP-DRU UTILITY DRUM FIXTURE - > 1500 INSTALLED

### SITUATION

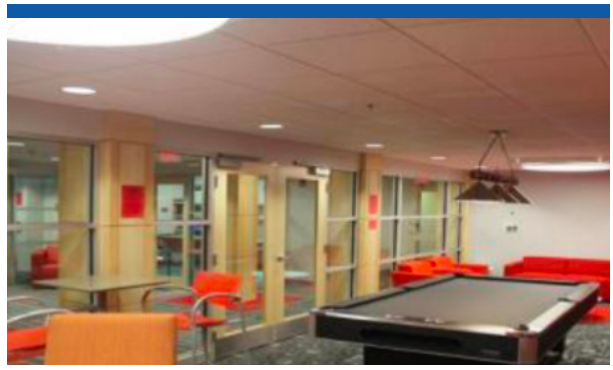

Student housing complex was poorly lit and very inefficient. Constant ballast failures took up much of the maintenance department's time. Students were forced to bring their own lamps to supplement the inadequate lighting.

### SOLUTION

Fluorescent fixtures in the corridors and dorm rooms were replaced with Remphos Utility Drum Fixtures. The drum fixtures are only 12W and easily covered the existing footprint so no paint touch ups were required.

### RESULT

Light levels improved by 60% while energy consumption was reduced by more than 50% in all of the fixtures. Ballast maintenance is no longer needed and the university will save just under \$50,000 per year in electricity.

*"The Remphos drum fixtures solved the maintenance issues and gave the dorm much better lighting"*

- Maintenance Director

*"The hallways and rooms look like new now that the lighting is installed"*

- Installer
