

LED SUCCESS

PROJECT

Decorative Fixture Retrofit

LOCATION

City of Cortland, NY
Courthouse and Street Lights

PRODUCT

LEDSEXT G2
Post Top Retrofit Kit

SITUATION

The old halogen lamps provided inadequate lighting along sidewalks. The city wanted an LED solution that allowed them to keep the existing fixtures.

SOLUTION

The old bulbs + ballasts were removed and replaced with LEDSEXT post top retrofit kits.

RESULT

A much brighter and evenly lit courthouse building is now a focal point in town. The retrofit was seamlessly installed into the beautiful existing fixtures.

"Beacuse of the successfulcourthouse project, we ultimately used the retrofit in many other applications throughout the city"

- Nic Dovi, City Public Works

"The retrofits were simple to install and wire...the light output is much brighter and even throughout!"

- Installer, Centrica Business Solutions
