

ELECTRICAL DISTRIBUTORS SHOWROOM NORTH SOUTH SUPPLY - VERO BEACH, FLORIDA

'WITH THE ABILITY TO SEAMLESSLY CONNECT UP TO 40 LBIs, THE RETROFIT TOTALED OVER 700 FT!'

PRODUCT USED

LBI-Linear Barkit Internal Driver

ACCESSORIES USED

90° Power Feed

Dimmable Seamless Connector

Suspended In-Line Kit

SITUATION

North South Supply was in the process of remodeling one of its locations. Part of the remodel included finding a better lighting solution that would seamlessly fit into the existing space.

SOLUTION

The showroom was retrofitted with (154) 4 FT LBIs, (3) 3 FT LBIs, and (8) 2 FT LBIs. Incoming power cables, seamless connectors and suspended in-line kits were used with the LBIs to seamlessly retrofit the new space.

RESULT

The LBI comes with a wide range of accessories that make it the leading RemPhos retrofitting product. As a bonus, the LBI is designed with **SUPERFLEX** technology, allowing for custom wattage and color temperature selection. These features packed together gave North South Supply's showroom a complete refresh that will also save them money in the long run. The RemPhos LBI was ultimately chosen for its sleek design, energy savings, and superior customer support. North South Supply plans to use the LBI in the remaining 6 additional branch remodels as well as in the 2 new branches being added.

Light Efficient Design
